## Lotrimin, The Killer Cure.

### Lotrimin Ultra Antifungal Athlete's Foot Cream

Tinea pedis, commonly known as athlete's foot, is caused when various types of fungus invade the skin. It usually occurs between the toes but can also occur on the bottom and sides of the feet.

- Cures most athlete's foot between the toes, jock itch, and ringworm with a 1 week treatment
- Starts relieving symptoms of itching, burning, cracking, and scaling in one day
- Greaseless, odorless, and non-staining
- Safe for kids over 2
- Contains butenafine hydrochloride 1%

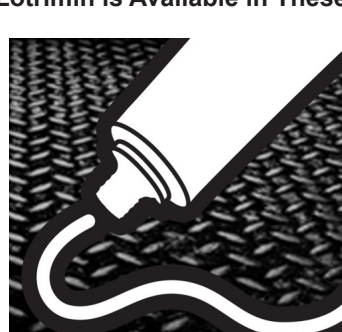

Athlete's Foot Ultra Cream

### PRODUCT HIGHLIGHTS

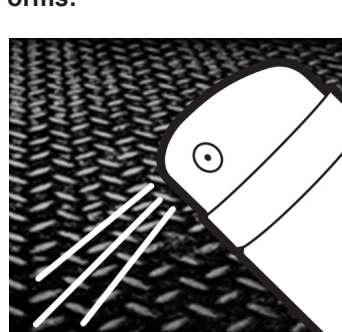

- Active ingredient butenafine hydrochloride 1% antifungal cream
- Also cures most jock itch and ringworm

### Lotrimin is Available in These Forms:

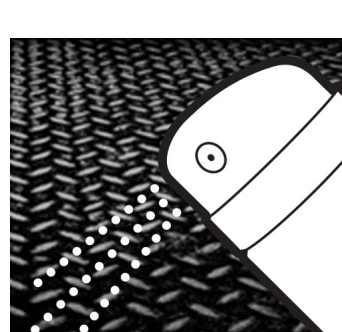

Lotrimin Cream

Choose Lotrimin Cream for athlete's foot when you want soothing relief for fungus on the skin between your toes, and on the bottom and sides of your feet. It's easy to apply smoothly on affected areas and cures most athlete's foot.

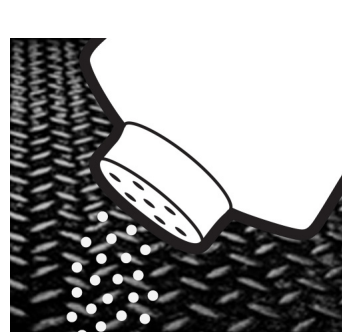

Lotrimin Liquid Spray

Athlete's foot can cause burning - even bleeding - feet, making it difficult to walk, run, or even just relax. Lotrimin Liquid Spray treatment for skin fungus provides cooling relief and cures most athlete's foot on large areas of the foot.

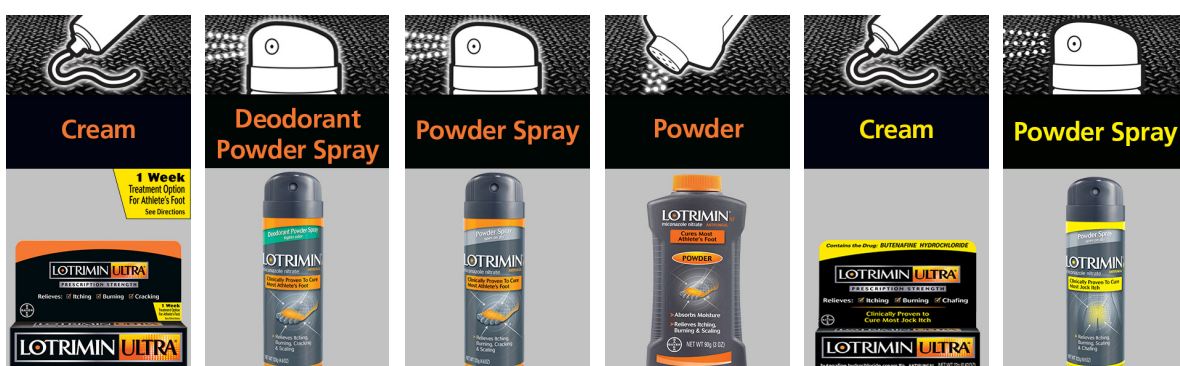

Lotrimin Powder Spray

Lotrimin Powder Spray formula not only tackles athlete's foot, but also helps prevent moisture. Featuring clotrimazole 1%, this antifungal powder spray cures most athlete's foot in hard-to-reach places.

Lotrimin Powder

Lotrimin Antifungal Powder keeps feet dry and cures most athlete's foot. Plus, you can use Lotrimin AF Athlete's Foot products as an effective treatment for jock itch (tinea cruris) and ringworm (tinea corporis) on your body, too.

## Frequently Asked Questions

### Q: How did I get athlete's foot?

A: Athlete's foot is most commonly contracted by coming into contact with an infected person or an object that has a fungus on it. Walking barefoot in locker rooms, public pools, or shower areas may increase the risk of contracting athlete's foot. People are most susceptible to athlete's foot when their feet are sweating or lack proper ventilation. Shoes create the ideal environment for fungus growth, as they provide a warm, moist area.

### Q: What are the symptoms of athlete's foot?

A: Athlete's foot can present as any one or a combination of these symptoms: itching, burning, scaling, inflammation, cracking, and discomfort.

### Q: How long does it take Lotrimin to cure athlete's foot?

A: Lotrimin Ultra with Butenafine Hydrochloride 1% starts relieving symptoms within one day and cures most athlete's foot between the toes in 1 week, when used as directed.
